Level One Headings Use (H2) Tags

Paragraphs use (P) tags. Unordered lists use (UL) tags.

- List items use (LI) tags.

- Text can be **bold (B)** , *italic (I)* , small (SMALL) , big (BIG) , or look like a `typewriter (TT)` .

- There are also ordered lists that use (OL) tags. Let's make one nested inside our current list item.

  1. Text can also be **strong (STRONG)** or *emphasized (EM)* , which typically renders like bold and italics.
  2. Webpages can have hyperlinks .
